

DASE 7053 Robotic Systems Integration

Group Project – QR Code and Game Field

1 Description of QR code

The QR codes used on the game field contain a structured string.

- Start point's QR code should be decoded as "START".

- Rack A's QR code should be decoded as "RACKA_XXXX".
- Rack B's QR code should be decoded as "RACKB_XXXX".
- Rack C's QR code should be decoded as "RACKC_XXXX".
- Rack D's QR code should be decoded as "RACKD_XXXX".
*XXXX is a random string which may include numbers and characters (e.g., 4X6M).
The XXXX string is unique for each team.*
- End point QR code should be decoded as "END"

Each team should submit a screen capture of the decoded result of each QR code to demonstrate the QR code scanning function of the robot.

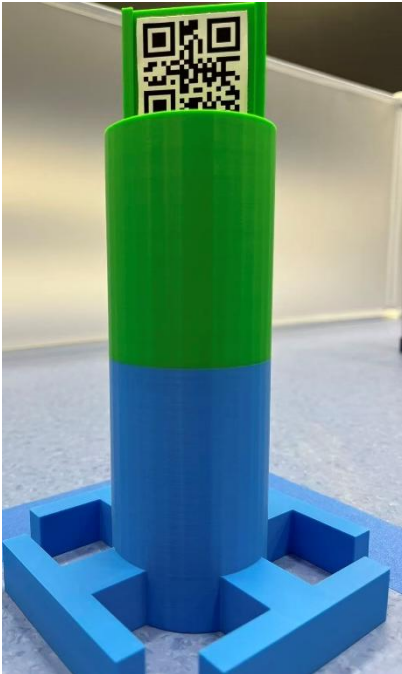

DASE 7053 机器人系统集成

小组项目——二维码与比赛场地

1 二维码说明

比赛场地上使用的二维码（QR code）包含一个结构化字符串。

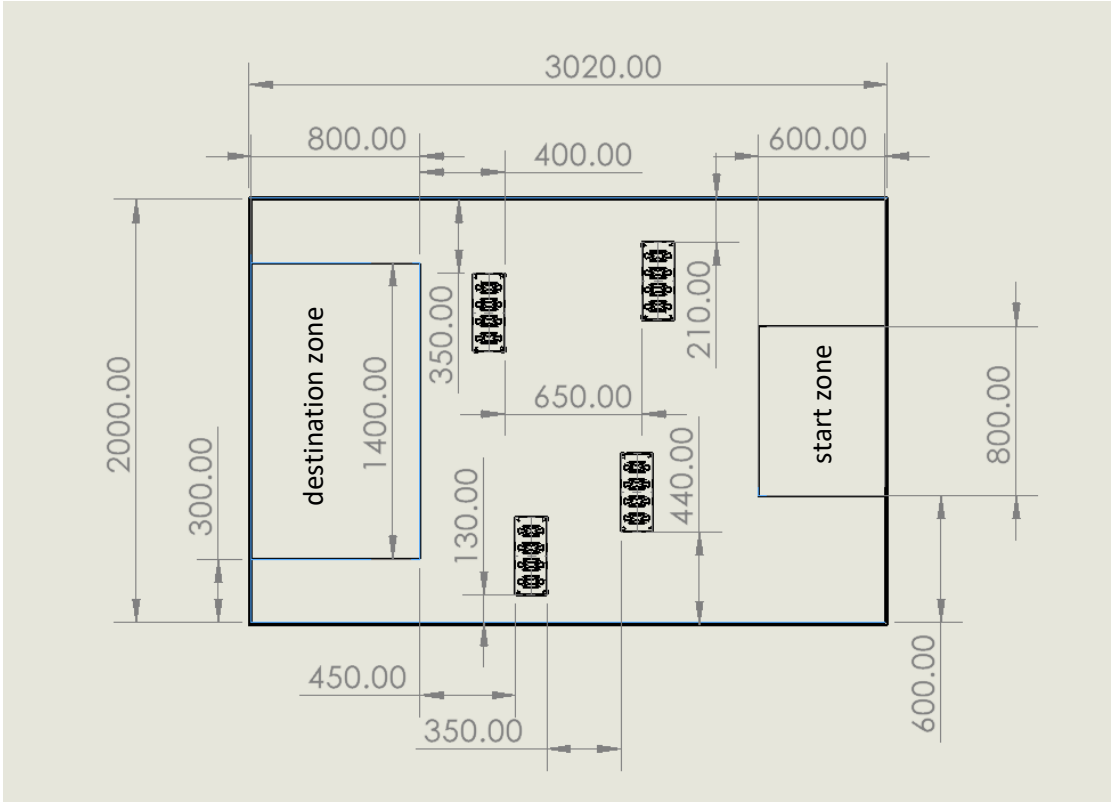

- 起点的二维码应解码为"START"。

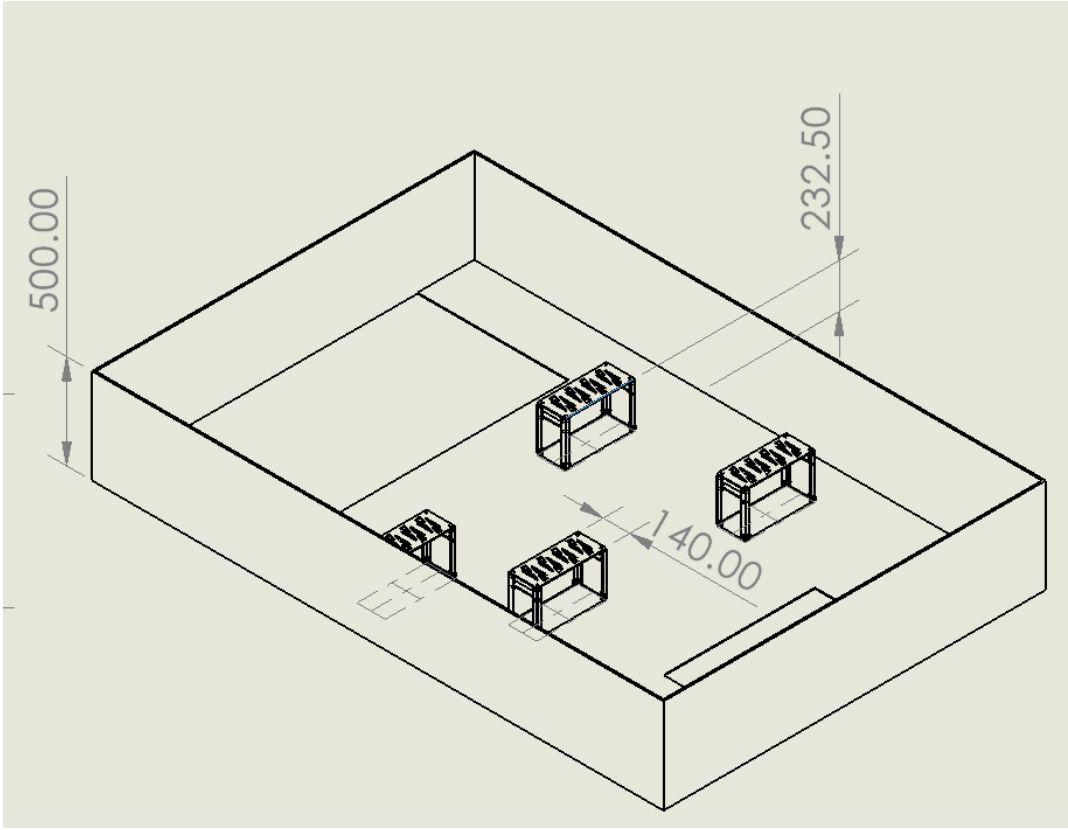

- 货架 A (Rack A) 的二维码应解码为"RACKA_XXXX"。
- 货架 B 的二维码应解码为"RACKB_XXXX"。
- 货架 C 的二维码应解码为"RACKC_XXXX"。
- 货架 D 的二维码应解码为"RACKD_XXXX"。
*XXXX 为随机字符串，可能包含数字和字母（例如 4X6M）。
每个团队的 XXXX 字符串均不相同。*
- 终点的二维码应解码为"END"。

每个团队应提交每个二维码解码结果的屏幕截图，以展示机器人的二维码扫描功能。
